Java

```java
class Solution {
    public int fillCups(int[] amount) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} amount
 * @return {number}
 */
var fillCups = function(amount) {

};
```

C++

```cpp
class Solution {
public:
    int fillCups(vector<int>& amount) {

    }
};
```

C#

```csharp
public class Solution {
    public int FillCups(int[] amount) {

    }
}
```
